

buildingSMART Norway

Transforming the industry with open standards

TOWARDS SUSTAINABLE CONSTRUCTION: THE PRESENCE AND FUTURE
21. 10 2021

Who are we?

buildingSMART Norway is a neutral interest organization that promotes innovation and digitalization in the construction, infrastructure and real estate industry.

We are [160 companies and organizations](#) from all parts of the industry and part of [buildingSMART International](#).

- Non-commercial
- Member driven
- Global

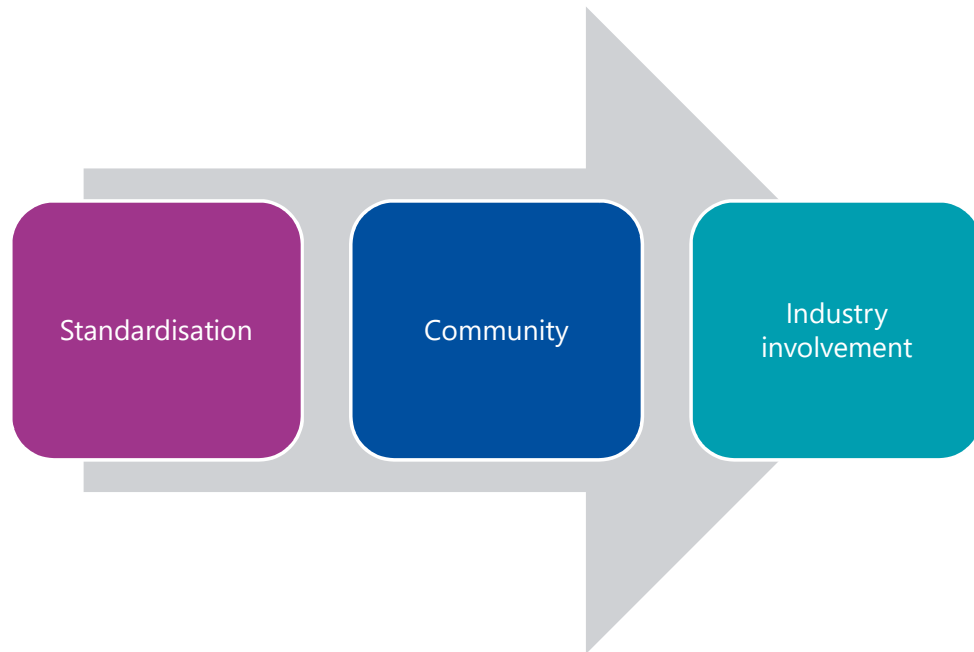

What do we do?

- buildingSMART enables free flow of information in the life cycle of the built environment;
- Improve the digital information in the construction process;
- We strive for efficient collaboration between actors through solutions based on open standards;
- Remove industry barriers.

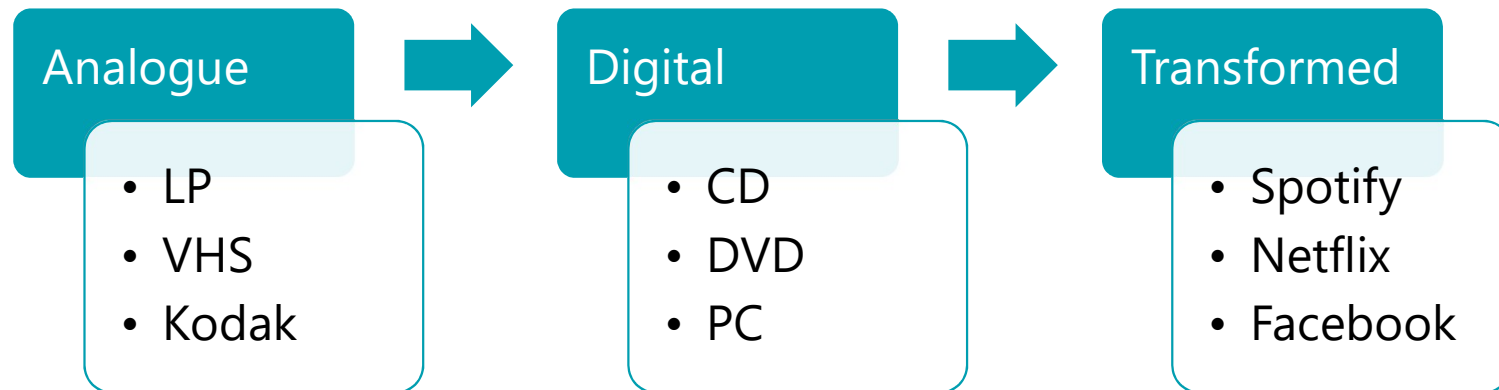

How do we do it?

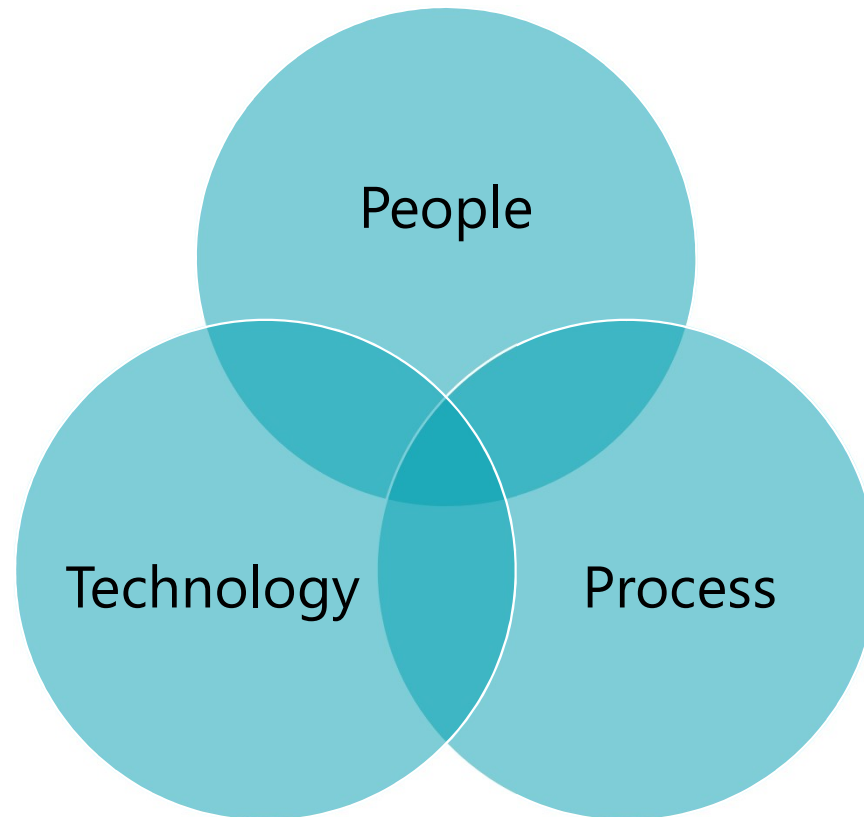

Digital transformation
